VIT-IOT(INDUSTRY CERTIFICATE INTERNSHIP PROGRAM)

ASSIGNMENT-3

NAME:GONTINA TEJASWI NAIDU
MAIL ID: tejaswi.19bes7001@vitap.ac.in

Assignment-3:

Develop a code to upload the water tank level and light intensity values to the IBM IoT platform and visualize them in the web application.

Python Code:

```
import wiotp.sdk.device

mport time

import landom
myConf1g=
"identity": {
"orgId": "dalxud",

"typeId": "Firsteevice "
"deviceId" : "54321”

"auth"

token": "0987654321"

def myCommandCa l lback (cmd):
print ("Message received from IBM IOT Platform: s" cmd.data ['command'])
m=cmd.data [ 'command"]

client = wiotp.sdk.device.DeviceClient (config=myConfig, logHandlers=None)
Client.connect (0

while True:

wlevel=random. randint (0, 100)
```

```
light=random. randint (0,100)
myData={ 'Water_Level':wlevel, 'Light_Intensity ' :light}
client.publishEvent (eventId="status", msgFormat="json", data=myData, gos=,
print ("Published data successfully: *s", myData)
client. commandcallback = myCommandcallback
time.sleep (2)
client.disconnect ()
```

Fig.1 Python code editor window

CODE:

```
import wiotp.sdk.device  import
time import
random myConfig = {
    "identity": {
        "orgId": "dalxud",
        "typeId": "Firstdevice",
        "deviceId":"54321"
    },
    "auth": {
        "token": “0987654321"
    }
}

def myCommandCallback(cmd): print("Message received from

IBM IoT Platform: %s" % cmd.data['command'])

m=cmd.data['command'] client =

        wiotp.sdk.device.DeviceClient(config=myConfig,

logHandlers=None) client.connect() while True:

    wlevel=random.randint(0,100)
    light=random.randint(0,100)
    myData={'Water_Level':wlevel, 'Light_Intensity':light}
      client.publishEvent(eventId="status", msgFormat="json", data=myData,
```

```
qos=0, onPublish=None) print("Published data
Successfully: %s", myData)  client.commandCallback
= myCommandCallback time.sleep(2)
client.disconnect()
```

```
